

# Product data sheet

Specifications

variable speed drive, Altivar 212,  
75kW, 100hp, 480V, 3 phases, with  
EMC, IP21

ATV212HD75N4

**Product availability: Stock - Normally stocked in distribution facility**

## Main

|                              |  |
|------------------------------|--|
| Device short name            | ATV212   |
| Product destination          | Asynchronous motors                                      |
| Phase                        | 3 phase  |
| Motor power kW               | 75 kW  |
| Maximum Horse Power Rating   | 100 hp   |
| Supply voltage limits        | 323...528 V  |
| Supply frequency             | 50...60 Hz - 5...5 %                                     |
| Line current                 | 141.8 A 380 V<br>111.3 A 480 V                           |
| Range of Product             | Altivar 212  |
| Product or Component Type    | Variable speed drive                                     |
| Product Specific Application | Pumps and fans in HVAC                                   |
| Communication Port Protocol  | METASYS N2<br>Modbus<br>APOGEE FLN<br>BACnet<br>LonWorks |
| [Us] rated supply voltage    | 380...480 V - 15...10 %                                  |
| EMC filter                   | Class C2 EMC filter integrated                           |
| IP degree of protection      | IP21   |

## Complementary

|                              |   |
|------------------------------|---|
| Apparent power               | 105.3 kVA 380 V   |
| Continuous output current    | 160 A 380 V<br>160 A 460 V  |
| Maximum transient current    | 176 A 60 s  |
| Speed drive output frequency | 0.5...200 Hz  |
| Speed range                  | 1...10  |
| Speed accuracy               | +/- 10 % of nominal slip 0.2 Tn to Tn   |
| Local signalling             | 1 LED (red) for DC bus energized  |
| Output voltage               | <= power supply voltage   |
| Isolation                    | Electrical between power and control  |
| Type of cable                | Without mounting kit 1 IEC cable 113 °F (45 °C), copper 90 °C / XLPE/EPR<br>Without mounting kit 1 IEC cable 113 °F (45 °C), copper 70 °C / PVC<br>With UL Type 1 kit 3 UL 508 cable 104 °F (40 °C), copper 75 °C / PVC |

Price is "List Price" and may be subject to a trade discount – check with your local distributor or retailer for actual price.

## Environmental Data

Schneider Electric aims to achieve Net Zero status by 2050 through supply chain partnerships, lower impact materials, and circularity via our ongoing “Use Better, Use Longer, Use Again” campaign to extend product lifetimes and recyclability.

[Environmental Data explained >](#)

[How we assess product sustainability >](#)

### Environmental footprint

[Environmental Disclosure](#)

EMC mounting plate (supplied with drive)

Mounting and Clearance

**Mounting Recommendations**

---

**Clearance**

Depending on the conditions in which the drive is to be used, its installation will require certain precautions and the use of appropriate accessories.

Install the unit vertically:

- Do not place it close to heating elements.
- Leave sufficient free space to ensure that the air required for cooling purposes can circulate from bottom to the top of the unit.

**Mounting Types**

Type A mounting

Type B mounting

Type C mounting

By removing the protective blanking cover from the top of the drive, the degree of protection for the drive becomes IP21. The protective blanking cover may vary according to the drive model, see opposite.

### Specific Recommendations for Mounting in an Enclosure

---

To help ensure proper air circulation in the drive:

- Fit ventilation grilles.
- Check that there is sufficient ventilation. If there is not, install a forced ventilation unit with a filter. The openings and/or fans must provide a flow rate at least equal to that of the drive fans (refer to the product

characteristics).

- Use special filters with UL Type 12/IP54 protection.
- Remove the blanking cover from the top of the drive.

### Sealed Metal Enclosure (IP54 Degree of Protection)

The drive must be mounted in a dust and damp proof enclosure in certain environmental conditions, such as dust, corrosive gases, high humidity with risk of condensation and dripping water, splashing liquid, etc. This enables the drive to be used in an enclosure where the maximum internal temperature reaches 50°C.

- (5) Source 0-20 mA, 4-20 mA, X-Y mA

Analog input VIA configured as positive logic input ("Source" position)

- (2) ATV 212 control terminals

Analog input VIA configured as negative logic input ("Sink" position)

- (2) ATV 212 control terminals

Performance Curves

Derating Curves

The derating curves for the drive nominal current ( $I_n$ ) depend on the temperature, the switching frequency and the mounting type (A, B or C).  
 For intermediate temperatures (45°C for example), interpolate between 2 curves.

X Switching frequency
